

## SeaPro™ 70 Pacific Whiting Meal

**SeaPro™ 70** is a high-protein whitefish meal derived from fresh cuttings of marine whitefish harvested and processed for human consumption. All processing is domestic and shore-based. All facilities are federally inspected. Commercial fisheries targeting Pacific Whiting (*Merluccius productus*) and ground fish species on the West Coast of the United States conform to Marine Stewardship Council ([www.msc.org](http://www.msc.org)) standards and reflect our “Sustainability Mission” to promote socially and ecologically responsible marine resource management practices worldwide. Utilizing only fish cuttings from established marine fisheries managed as sustainable natural resources is the best way to ensure our product is wholesome, renewable and consistently available.

**SeaPro™ 70** is a consistent feed ingredient. Product specifications do not vary seasonally and each production lot is formulated and blended to standard nutrient levels. Our ingredient is a concentrated source of highly digestible fish protein and provides supplemental levels omega-3 fatty acids including docosahexaenoic (DHA) and eicosapentaenoic (EPA). It is stabilized with natural antioxidants. This premium product is ideal for improving feed protein quality, reducing dietary ash, and validating flavor, label and natural claims.

**SeaPro™ 70** is produced solely in the United States of America. It is traceable with documentation showing source and disposition of all raw material utilized in production and final product formulation. Our company benefits from vertical integration within a human seafood company, Pacific Seafood Group, through access to their electronic tracking of fish catch, landings, and processing; and the subsequent disposition of fresh fish cuttings. Pacific Seafood Group maintains strict quality standards based on scientifically-derived FSMA/HACCP systems at all our locations to ensure that the product you receive is the highest quality.

Customers are always welcome to visit our facilities and review our practices. Our definition of excellence, “*consistently doing your best and always striving to do better*” demonstrates our commitment to providing a traceable, sustainable and wholesome product to our customers and yours.
